

ABSTRACT OF DISCLOSURE

5 The invention relates generally to the field of warning signs intended to alert one of
presence of an animal and intruder deterrence. More specifically, the invention
integrates an adjustable motion detector, a warning sign, a light source aimed at the
warning sign, an audio announcement and a replica of an animal or other image
with another light source for its illumination. The motion detector senses the
10 presence of a person and sends an activation signals to the audio and light sources.
The first light source illuminates the warning sign, while the second light source
illuminates the replica of an animal or other warning image, adding a sense of a
realistic warning to a casual passer-by and a threat to the intruder.
